About Eurospeak

Established in **1992**, Eurospeak is an **international college & training center** with students from over 70 nationalities. The college delivers job oriented courses that are targeted to provide the right knowledge and skills to individuals to succeed in their professional lives. The college boasts of **excellent industry links** and provides all the assistance to its students to secure employment. It is located in Reading, just **25 minutes by train from Central London**.

About Innobuzz Knowledge Solutions

Innobuzz is headquartered at **Delhi, India** with strong presence in **Australia, United State of America and Canada**, apart from many other countries. The main activity of Innobuzz is providing training in **Information Security**, which is delivered to its audience **all over the world** via **Computer Based Training Courses, Onsite Training Programs** and Company Owned **learning centers**.

Our Aim

Information Security is still a less explored field in the Global IT technical domains. We aim to impart **practical knowledge** in Information Security and Ethical Hacking to the budding technical workforce of the country. Information Security is the need of the day, and people having such skills are very much in demand. We aim to bridge the gap between the demand and supply of Information Security professionals.

Active Participation in Various Initiations

We have also been supporting and actively participating in various **Information Security Seminars and Summits** such as **EliteX 2008** organized by Department of Information Technology (Govt. of India), **Security Vision 2009** (an IDG Initiative), **NASSCOM Security Summit**, 2 Day **National Seminar on Information Security** at DCE.

Industry Tie-Ups

We have strong linkages with the industry. Being partners with organizations like **Microsoft Corporation**, **IBM**, **HP** and **Symantec**; we have conducted training programs in many big corporate houses of the world. Innobuzz has been **training and certifying** experts in **Ethical Hacking and Information Security** with its **Certified Information Security Expert (CISE Level 1 v2.0) certification**. In the short span of time, we have catered to over **5500 students in Information Security alone**.

Our Clients

Some of Our Corporate Clients are **Fidelity Investments**, **DLF**, **IBM**, **Spice Jet**, **CSI**, **Colt Telecom**, **Arya Ventures**, **Dewsoft**, **L&T**, **Godrej**, **FICCI**, **Govt. of India** and many more.

Course Description

Online Security Breaches are happening at a very fast rate and experts are needed to check and cure these. ITS (IT Security) Experts are in demand. The course is designed for people who have theoretical knowledge of basic concepts about networking & the internet. This course will provide detailed & **practical** knowledge on various hacking concepts. The course will be followed by 100% Practical exam which will be conducted through online Labs, clearing in which you become a **Certified Information Security Expert (CISE Level 1 v2.0)**.

CISE Level 1 v2.0 (Certified Information Security Expert) certification is one of the most recognized certifications in Information Security and Ethical Hacking. The program covers all aspects of Information Security and Ethical Hacking, enabling one to become an Information Security Expert.

Prerequisites

Basic Knowledge of computers and Internet

Course Highlights

- The premier certification in **Information Security**.
- Covers both sides of the coin - hacking and security.
- Hands on course with over **150 practicals** covered with Live Demonstrations.
- Covers latest **techniques and practices** in the industry along with CASE STUDIES.
- Created by leading security professionals from **IIT Delhi and JHU, Maryland**.
- Assignments and Research Projects given at the end of each Day.
- Industry endorsed Course, Training methodology and Certification.

Training Features

- The Training Program will be 5 Days long.
- Students will be given adequate time to revise and practice the concepts learned in class.
- This Training Program covers **Presentations**, Real life Case Studies, Extensive Live **Practical Demonstrations**. An **Experienced Faculty** with a minimum experience of 3 years will be available to provide you training in order to help you start a career in Information security.
- Featuring Instructor-led classroom sessions with **full A/V and demonstration**.
- Intensive hacking and counter-hacking hands-on demonstration components.

- In this training program, students will get Assignments & Practicals as homework as well which will help them to explore the already learned concepts in the classroom & to guide them towards a path for research and development on each domain.
- The Training Fee already includes the cost of the Courseware. Courseware includes the Training Book along with the 4 DVD Toolkit. This Toolkit will include all the Tools and Scripts which will be required during the Training Program and the necessary information to assist you to finish the assignments which will be given to the students.
- We will also provide an Operating System developed in our own Labs & Tools which have been developed by the Core Technical Team.
- Focused on practical solutions to real-world development problems.
- Online Labbased CISE Level 1 v2.0 Exam

Our Training Methodology

Our Training Module is designed in such a way that reinforces the student to focus on self-learning as well. Our Training Modules and Training classes are structured in such a way that students have to take out time to research over the tools and concepts that they have learned in classroom in order to complete the assignments.

CISE Level 1 v2.0 Certification Exam

The CISE Level 1 v2.0 Exam requires the student to clear the test in a live, simulated environment. This testing method evaluates the practical, hands-on skills as compared to simply answering multiple choice questions. Once obtained, the **CISE Level 1 v2.0 certification** provides testament of your Ethical Hacking skills in a real life environment. **Innobuzz Knowledge Solutions** holds its students to a higher standard than any other information security certification today.

Requirements for Training Program

Laptop Required - To get the most value out of the course, students are required to bring their own laptop so that they can connect directly to the classroom network that we will create. It is the students' responsibility to make sure that the system is properly configured with all drivers necessary to connect to an Ethernet network.

CISE Level 1 v2.0 Training Module

Chapter 1 – Introduction
Chapter 2 - Networking & Basics
Chapter 3 - Footprinting
Chapter 4 - Google Hacking
Chapter 5 - Scanning
Chapter 6 - Windows Hacking
Chapter 7 - Linux Hacking
Chapter 8 - Trojans & Backdoors
Chapter 9 - Virus & Worms
Chapter 10 - Proxy Server & Packet Filtering
Chapter 11 - Denial of Service
Chapter 12 - Sniffer
Chapter 13 - Social Engineering
Chapter 14 - Physical Security
Chapter 15 - Steganography
Chapter 16 - Cryptography
Chapter 17 - Wireless Hacking
Chapter 18 - Firewall & Honeypots
Chapter 19 - IDS & IPS
Chapter 20 - Vulnerability Assessment
Chapter 21 - Penetration Testing
Chapter 22 - Session Hijacking
Chapter 23 - Hacking Web Servers
Chapter 24 - SQL Injection
Chapter 25 - Cross Site Scripting
Chapter 26 - Exploit Writing
Chapter 27 - Buffer Overflow
Chapter 28 - Reverse Engineering
Chapter 29 - Email Hacking
Chapter 30 - Incident Handling & Response
Chapter 31 - Bluetooth Hacking
Chapter 32 - Mobile Phone Hacking

Job Opportunities

- Ethical Hacker
- Network Security System Administrator
- Web/IT Security Administrator
- Information Security Officer/Security Auditor
